

Introduction

Our Mission

“ Help educate and empower our clients by providing Risk, Governance, and Security Specialists for all their security and privacy needs; delivering above expectations; developing actionable reports; and by becoming their trusted security partner “

At RGS Specialists, we pride ourselves on not just being another consultant; not just another follower. We are more than just consultants, we are Leaders; we are Specialists.

We provide high quality services specializing in Risk, Governance, and Security (RGS) that help our clients to build cost-effective, highly defensible, and easily operationalized security controls and programs.

Let us help you choose the right path.

For more information email us at info@rgsspecialists.com or visit our website: www.rgsspecialists.com today.

Overview

- ♦ **Assess**—Review current controls, identify gaps, and provide remediation guidance.
- ♦ **Plan**— Strategic guidance on how to build a sustainable security program.
- ♦ **Build**— Design and deploy consistent and proven security controls.
- ♦ **Manage**— Design, test, and deploy: operational preparedness (BCP/DR), incident response capabilities, and security guidance to support the security lifecycle.

RGS Specialists: Services

We help you find the perfect balance.

For more information email us at info@rgsspecialists.com or visit our website: www.rgsspecialists.com today.

Highlights

- ◆ **Vulnerability Assessments**— A technical review of the environment using “Ethical Hacking” designed to help answer: Are your security controls effectively protecting your organization?
- ◆ **Compliance Assessments**—A security review of your compliance controls to help answer: Are you compliant with standards and regulations that govern your business?
- ◆ **Risk Assessment**—A detailed look at all risks that have potential impact on the business to help answer: Do you know and operate within your organization’s Risk appetite?

RGS Specialists: Assess

RGS Specialists are experts at identifying, quantifying and prioritizing your security Risks. Using a business enabling context, our assessment specialists review the existing security controls and identify any gaps that may be present. We are able to map the technical finding back to the failure of the security control(s) in concise easy to understand reports to identify immediate cost-effective actions and longer term road maps for your IT security spending.

**Threats Change;
Does Your Security?**

For more information email us at info@rgsspecialists.com or visit our website: www.rgsspecialists.com today.

Highlights

- ◆ Provide assurance that the information security strategies are aligned with and support business objectives.
- ◆ Help organizations understand and abide by the plethora of existing and emerging regulatory compliance controls, including HIPAA, PCI, NERC, and SOX.
- ◆ Identify appropriate stake holders to help ensure the security team is empowered with the resources necessary to be successful.

RGS Specialists: Plan

RGS Specialists' Governance services help our clients create a sustainable information security program in accordance with industry standards, including NIST SP800-100 *Information Security Handbook: A Guide for Managers*.

When developing a security program we ensure that policies, procedure, and guidelines are established and they are communicated downstream so everyone is aware of their responsibilities in protecting the organization and the data consumed/transmitted.

You + Us = Success

For more information email us at info@rgsspecialists.com or visit our website: www.rgsspecialists.com today.

Highlights

- ♦ **Architecture & Engineering**— Ensuring that the installation of new security controls follow clearly defined plans, are well documented, have a clearly defined management process, and meet/exceed best practices
- ♦ **Program Oversight**— Developing and managing project plans, status reports, budgets, deliverables and milestones for all security projects.
- ♦ **Training**—Help developing and deploying security awareness and training programs.

RGS Specialists: Build

RGS Specialists Security Services help organizations in the management of security risks by designing and deploying consistent and proven controls within the environment. Our services help organizations address common security related risk reduction solutions including boundary controls, secure communications, encryption, anti-malware, and identity management with the goal of providing secure and reliable controls across the organization.

**Build Solutions,
Build Success.**

For more information email us at info@rgsspecialists.com or visit our website: www.rgsspecialists.com today.

Highlights

- ◆ BCP/DR– Development and testing of business continuity and disaster recovery readiness.
- ◆ Incident Response— work closely with the security and business team to identify goals, build incident response action plans, identify key incident responders, and to test the capability.
- ◆ Security Guidance—Dealing with budget cuts? Terminated a key resource? Promoted to CISO? We can help you address these and other “Gotchas”.

RGS Specialists: Manage

Over the course of time there are often unforeseen circumstances – “Gotchas” that strain even the best security programs. Knowing how to deal with these one off events could mean the difference between a successful program and one destined to fail. At RGS Specialists we have lived on both sides of the fence (consulting and enterprise) and lived through, and more importantly learned from, many of the similar challenges you may face. At RGS Specialists we provide Security Guidance for these “Gotchas” that help our clients overcome these hurdles and achieve a successful security program.

Bad things happen; are you prepared?
